

FG Sprinkler Conference 2024, 20. - 21. March

Radisson Blu Airport Hotel Gardermoen

Welcome to the FG Sprinkler Conference 2024

The FG Sprinkler Conference is finally back after Covid and years with Teams meetings.

It has been a great interest for the conference, and we are proud to be back on track and announce a conference at the highest level of expertise.

For those who have attended previous events you will recognize that it will be a few updates, but the format will be the same as previous events.

FG Skadeteknikk will forward the aim to present an annual conference to provide all actors with a professional refill and current update in the field of sprinkles and extinguishing systems.

The conference will bring together the sprinkler industry and representatives from insurance, authorities, fire departments, suppliers, and fire engineering environment. The event is open to everyone.

The conference is in Norwegian, but to present technique and expertise at the highest level we invite international speakers who make their presentation in English.

This is this year's great opportunity to meet international expertise with exhibitors and speakers from home and abroad.

[The program](#) will give an insight and overview of the most important themes and work that is ongoing or published in Europe and Norway.

This will have an impact for all parties involved in our business. The program will be presented by highly recognized speakers from USA, Europe, and Norway, that represents important forums around the world. We are grateful that they will prioritize a visit to Norway, this is not something we take for granted – so this is your opportunity to see them.

SPRINKLER
KONFERANSEN
2024 OSLO

What everyone in this business especially must be aware of is the ongoing work with the installation standard EN 12845. We are happy to announce that we will have the convener Karim Karzazi and one of the most important contributors to the standard from FM Global – Ludger Tegeler present to give a lively insight in the ongoing work, and which results we may expect.

Further, the program content will speak for itself.

The Authorities will be represented, Insurance, Kiwa, Organizations, news from Norwegian standards and a presentation of the new report about back flow prevention when connected to public water supply.

Some are present at the conference for the first time and have more knowledge than they can convey in a presentation. Get in touch, they're going to be present at parts of the conference and are happy to have a conversation with you.

FG Skadeteknikk, will as the organizer give comments and a presentation during the event, every one of us will be present during the whole event if you have something to address.

Our call becomes — show up!

If you haven't been to the conference before, you'll get an impression by accessing the link to the FG website and [the conference 2020](#) - where you'll find photos and previous lectures.

Practical information:

Program and updates can be found on the website [FG Sprinklerkonferansen 2024](#).

Exhibition, registration, and social space – serving, opens at 09:00 a.m. Wednesday.

The conference starts at 10:00 a.m. Wednesday, and ends Thursday 3:45 p.m.

Luggage is not allowed into the conference hall, and all must use the luggage compartment.

Wednesday, March 11th at 7 p.m., everyone is encouraged to attend the conference dinner.

A 3-Course dinner menu including drinks will be served, good mood as always and some entertainment.

Many of the speakers, exhibitors and organizers have prioritized attending the dinner to be available in a pleasant socializing, we hope for your contribution by participating.

The following pricing and enrollment options apply:

It is important for FG to inform that Finance Norway and insurance do not add cost resources used for planning and implementation of the conference. Speakers line up without fees except for free participation. The event involves a certain financial risk covered by participation fees and contributions from exhibitors. A possible surplus is returned to the industry by funding useful projects or contributions to standardization work.

1. Participates both days: 5.500 NOK.
2. Attending day 1: 2.800 NOK.
3. Attending day 2: 2.800 NOK.
4. 3-Course dinner with drinks: 1.400 NOK.
